Electronic Portfolios –
Web Application Developer Exit Portfolio 2019

Dear Student,

If you are reading this document, you are close to graduating with either the Web Application Developer Degree or Certificate. First congratulations! Second, thank you for attending Edmonds Community College. And last, below are the requirements for your exit portfolio.
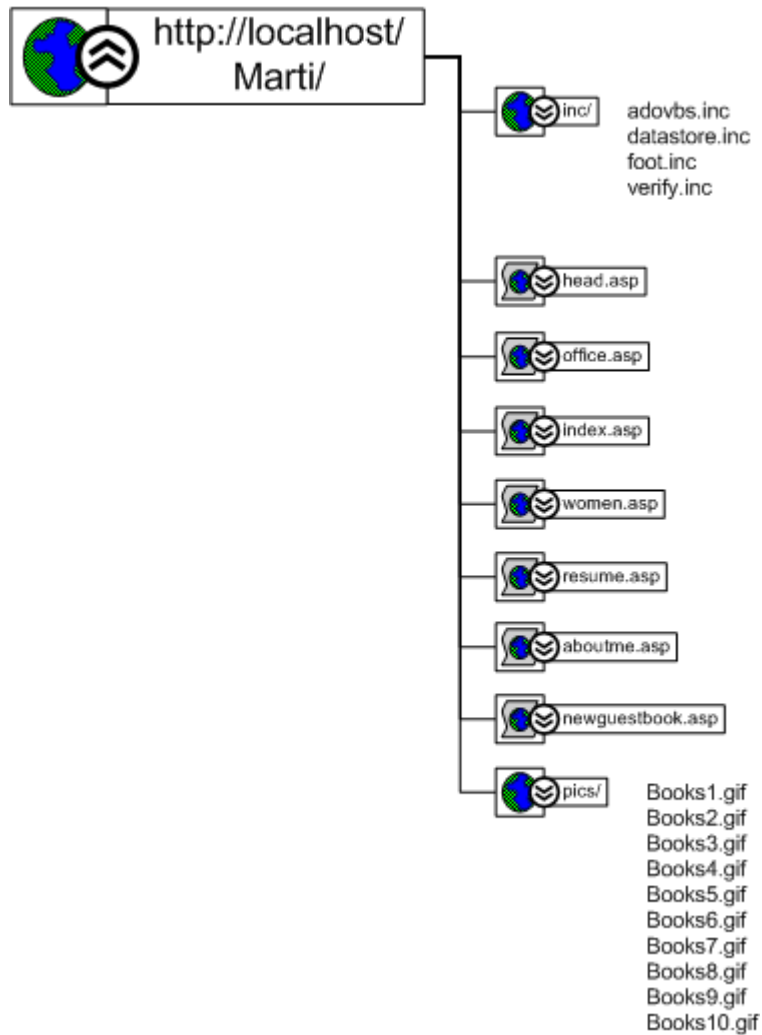

This portfolio should highlight the work that you've completed within your degree or certificate. You will be building a Professional Web site built upon the work that you've completed within your courses. This site may be a "re-build" of the personal site that you created in CIS 241, if it was a part of that course.
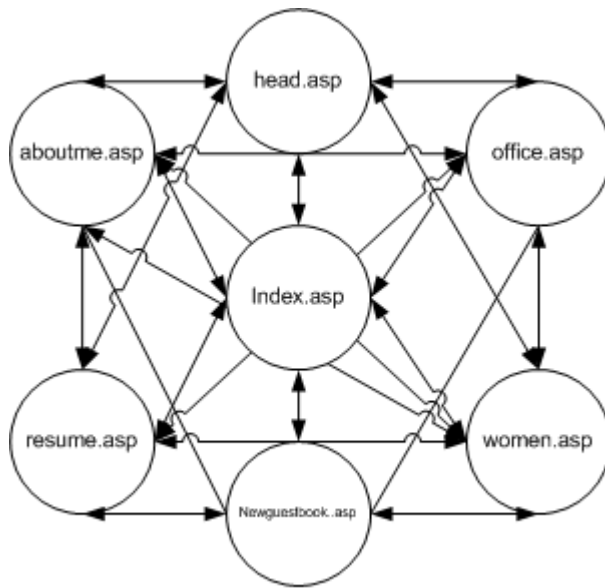

Site Requirements:

Create a professional web site introducing yourself and your work in the degree. This site should include:

1. A home page introducing yourself. This page must be named either **index.html** or **index.php**

2. A resume page. Do not include your address or phone number within this resume; do include your email address.

3. An interest's page. What is it you do when you're not being a student?

4. A course studies page. You should include in this page links to the courses that you completed during your studies. You should include links to:

    a. (if you are completing the degree) 10 of the courses you have completed.
    b. (if you are completing the certificate) 5 of the courses you have completed.

5. Each course that you link should have:
    a. a description of the course.
    b. a copy of the syllabus for the course (another link from that course page).
    c. a summary from you about what you learned in the course.
    d. links to examples of your course work.

6. You should include documentation on this web site in a folder called documentation. This documentation should include:

a. a folder structure diagram. This folder structure diagram should include all files required to build your exit portfolio site, including this documentation folder. An example of the this diagram is:
    b. a site navigation diagram. An example of this diagram is:

    c. a site "standards" document. An example of this document is:

Font: Times New Roman

Color scheme:

Color Name	Hex	RGB	General Usage
Puget Sound Green	#829F82	130, 159, 130	Background
Olympic Blue	#82A2C1	130, 162, 193	Header
Misty Mist	#D6DDAA	214, 221, 170	Menu background
Black	#000000	0, 0, 0	Text
White	#FFFFFF	255,255,255	Highlight

      d.   a site wireframe. An example of a wireframe:

What to turn in and how to turn it in:

Contact Louis Ho @ louis.ho@email.edcc.edu requesting an account / access to the Web Development Production Server: cyberia.sandbox.edcc.edu Once access is given, you will:

- FTP your completed site to the Web Development Production Server
- Notify Jan Griffin at jgriffin@edcc.edu and Louis Ho at louis.ho@email.edcc.edu that the electronic portfolio (web site) has been FTP'd
